

AVERA

Authentic, vibrant appearance.
The transparent coating allows the
original natural appearance of
the fibre cement to shine through.

AVERA

Avera is a naturally dried and through coloured fibre cement panel with a dynamic production process that gives it an unmistakably natural and authentic texture. The colour range around Avera is composed of versatile and combinable shades that ideally bring out the cloudy look of the colour line.

The highly resistant standard coating makes these panels particularly scratch-resistant and protects them from heavy soiling and graffiti. The transparent coating allows the natural appearance of the fibre cement to shine through, creating a lively surface look with varied texture and dynamic colour tones.

House on Haliburton Lake, Ontario, Canada. Architect: +VG, Toronto, Canada. Photographer: David Whittaker Photographer Inc., Toronto, Canada.

Technical data

Panels

The panel is coloured through.
Coating: Transparent

Panel format

Swisspearl Largo:
Maximum usable format 3050 x 1250 mm,
panel thickness 8 mm

For a detailed summary of the sizing and color options, please refer to our delivery program.

Colours

9 standard colours.
Deviations in the colour shades of the different panels are a natural part of the production properties underlining the vibrant, expressive character of the material.

Mounting

Visible on wooden substructure:
Screws with painted heads

Visible on metal substructure:
Blind rivets with painted heads

Invisible on metal substructure:
Undercut anchors

Technical data
