

TERRA

Earthy, warm atmosphere.
The finely coordinated colours
are reminiscent of earthy
tones and give the building
shell an earthy, natural look.

TERRA

Terra is a naturally dried grey fibre cement panel with a translucent, strongly pigmented surface. The name Terra represents the epitome of the character for the earthy warm tones.

Without noticeably large colour gradations, Terra manages to go from a light to a very dark brown with 6 tones, while preserving the harmony of the colour family. The finely balanced colours are reminiscent of earth tones and give the building envelope an earthy, natural look. Terra allows buildings to merge with their natural surroundings, giving them an approachable warmth and comfort without losing their strength and expressiveness.

Inspiration atelier 522.

Technical data

Panels
